Description of application.

This webpage is an online trading blog system that allows users to sign up and then login to the website to browse the blog posts from other users or create their own posts if they want to.

When signing up to the website, an email is sent to the user with their username and password.

The website also allow users to comment on the articles they read and make friend with other users that have signed up to the website.

Both users and articles on the website allow filtering with a search feature.

Once the user is signed up and logged in the user can set their profile picture and their personal information.

The user password can also be updated if the user so desires.

Home page screenshot is below:

- 4. Copy the project folder into C:\xampp\htdocs
- 5. Now proceed with setting up the MySQL database

Setting up the Database

Before the website can be launched and operate successfully the MySQL database need to be set up first.

1. Open PHPMyAdmin at http://localhost/phpmyadmin/index.php

🖬 Trading Blog 🛛 🗙	🚜 localhost / 127.0.0.1 phpMyAdm 🗙 🕂	- 🗆 X				
\leftarrow \rightarrow C \triangle (i) localhost/phpmyadmin/index.php \Rightarrow \emptyset $\not \in$ \bigcirc \blacksquare
